CURRENCY: Euro (€)
GOVERNMENT: Parliamentary democracy
CALLING CODE: +372
TIME ZONE: UTC+2
CLIMATE: Estonian climate is humid and temperate. 50% of Estonian land is covered by forests.
MEMBERSHIP: EU, NATO, OECD, WTO, DIGITAL 9, Eurozone, Schengen Area
GDP in current prices (2019): 28,027.6 million EUR

Estonia belongs to the North and forms as a part of Scandinavia. That means unspoilt nature, white nights and dark days. It also means the quality in both thinking and action, as well as sustainable development and concern for the future. The geopolitical location of Estonia, its compactness and thousands years of experience in communicating towards the northern, the western and the eastern directions give Estonia truly a unique position.

Estonia can offer a progressive business environment with an efficient and compatible infrastructure. Quick reforms, innovation and openness has made the country reliable partner in many sectors. Estonia combines elements of both the old and new economy – while the success of the technology sector has made the start-up scene blossom, the country is also moving up in the value chain in manufacturing sectors.

Estonians are adaptable towards changing world and new technologies. We are pioneers who apply efficient means and do so quickly. We are adapters.

photo: Sven Zacek

Estonian Printing Industry

Estonian printing sector is a technology-driven industry with a high use of digital technologies, also the implementation of automatization and smart energy solution is part of everyday business.

With a turnover of 400 million euros, employing around 4000 people in 450 companies the Estonian printing industry is an important economic contributor.

The domestic market needs have met, so the export is a vital part of Estonian printing industry, 50% of printing products and 75% of packaging are exported (2019).

Estonian printing companies export all over the world, the main export partners are in Europe. Finland and Sweden are the top export destinations, followed by Norway, Denmark and Latvia.

Let's print the future together!

www.ar-packaging.com
tabasalu@ar-packaging.com

About us

AR Packaging Estonia is member of AR Packaging Group. AR Packaging Group is one of Europe's leading companies in the packaging sector with a turnover of € 620 million and 3 300 employees in 19 factories in eleven countries. AR Packaging Estonia was formed in 2011.

The group creates added value to customers by a broad product offering and deep knowledge of packaging. We offer carton-packaging concepts to a wide range of consumer market segments. By looking at the whole value chain and the importance of packaging to both function and communication, we provide solutions that create brand value and make room for business improvement. Our main focus is on maximizing the business value of packaging for our customer.

Your partner in powerful packaging

For decades, we have partnered with our customers to find powerful ways of presenting and protecting their products and increasing their brand value and sales. With literally thousands of ideas and solutions, we can strengthen your brand and attract new customers. Because we understand the importance of your product's impact on the shelves, we prioritize your packaging solution's ability to be reproduced in everything from neutral to lacquers and embossing and more. Whatever your needs, our packaging solutions provide power to your product.

Solutions

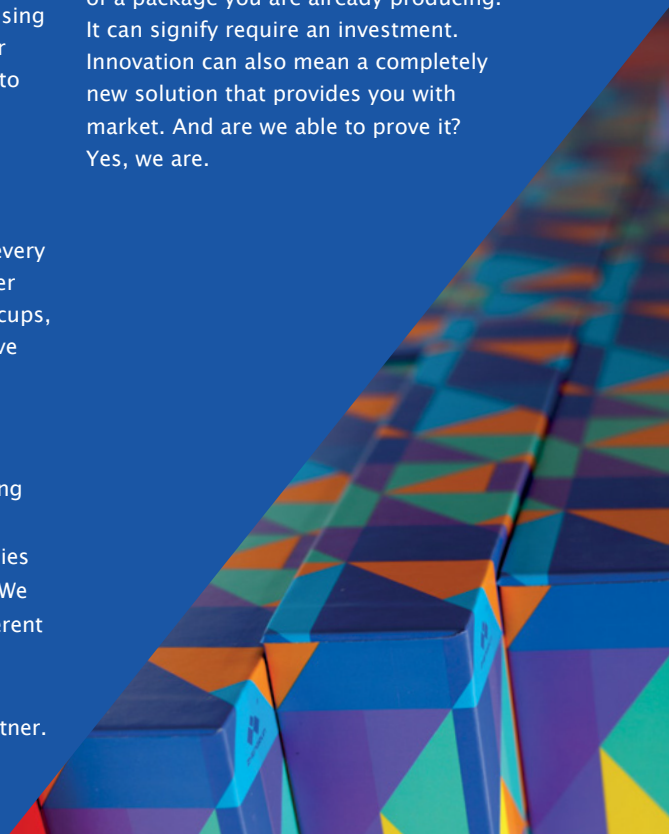
At AR Packaging Estonia, we have a great product portfolio that meets every aspect of perfect packaging. We offer everything from general cartons to cups, trays, multipacks and truly innovative packaging solutions.

Market segments

At AR Packaging Estonia, we have long experience in developing packaging and packaging solutions for companies within many different market areas. We understand the demands of the different target groups and their customers. Our broad knowledge and in-depth experience makes us the perfect partner.

Innovation adding value to your product

At AR Packaging Estonia, innovation is the word for helping you strengthen your product, your brand and your business. It could mean cutting the cost of a package you are already producing. It can signify require an investment. Innovation can also mean a completely new solution that provides you with market. And are we able to prove it? Yes, we are.



ABcom Services Ltd. was founded in 2000 and is a dealer and service provider of Xerox office- and professional equipment.

The company employs 15 people and has representative offices in Latvia and Lithuania.

In 2007, ABcom expanded its product range and began selling Xerox paper and special materials.

Since 2008, ABcom Xerox Partner status became from business partner to Premium Partner. Xerox Premium Partner is a company which represents only Xerox® equipment and brand and has achieved high customer satisfaction and sales results in their region. Premium Partner status is associated with offering full solutions for office equipment and for industrial printing sector as well as after-sales warranty and maintenance services.

In 2009, we introduced and began using an integrated environmental and quality management system that meets the norms of the international ISO 9001: 2008 and ISO 14001: 2004 standards. The certification was conducted by the Estonian branch of Lloyd's Register EMEA.

From 2009 we have expanded the product range and now represent following manufacturers: EBA, Morgana, Dumor, Vivid, Nagel, Longer Machine, Uchida.

The range consists of

- cutting machines,
- paper folders,
- binders,
- booklet makers,
- name card cutters,
- laminators, etc.

Data Print
ETIKETID • LABELS

Data Print is a modern, flexible and rapidly developing flexo and digital printing house located in Estonia.

Our main output comprises adhesive and plastic stickers.

We offer our services in areas related to food, beverage, pharmaceutical and chemical industry. Excellent quality is guaranteed with the help of the best suppliers in this industry: Avery Dennisson, UPM Raflatac, Gallus, HP Indigo, Sun Chemical, Flint Group, etc.

Modern technology – quality product

Data Print offers high-quality adhesive labels, new materials and solutions combined with reliable service. Data Print's priority is to be the best partner for its clients.

Digital personalization – different information on each label

As there are no printing plates, HP INDIGO 6000 Digipress is capable of separately applying customised information or imagery onto each label.

Our production activities are focussed on labels and related products

Our product range includes:

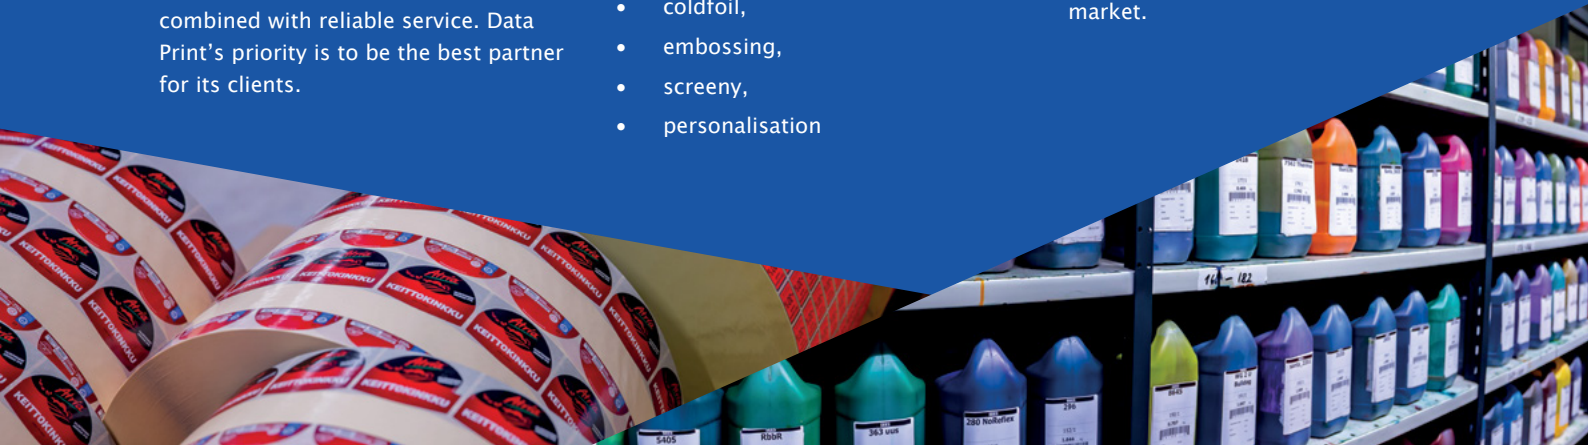
- self-adhesive labels,
- wrap around labels,
- dual labels,
- hotfoil,
- coldfoil,
- embossing,
- screeny,
- personalisation

The range of self-adhesive labels includes products from blank labels to dual or special labels in ten colours. Wrap around labels can be printed on transparent, white or metallised material.

Quality

We are the first label printer in Estonia that holds the HD Flexo certificate, which confirms the quality of our flexo printing products. Our production activities and sales have been confirmed with an ISO 9001:2008 certificate.

We are an innovative company. New investments and constant perfection of our processes help us offer increasingly better services to our clients and strengthen our position on the selected market.



QUALITY, FUNCTIONALITY AND RELIABILITY

Our products are sold under the Brand, Eazzy because our totems and displays are just what the brand says: easy to produce and easy logistic with its flat packaging.

We have thought about the whole chain – the working environment for our employees in production, reduce shipping and environmental impact with flat packaging and most importantly: that our clients can easily mount the displays without tools or complicated assembly instructions - in just seconds.

We want to increase our customer's sales with easy and representative store communication!

We work with the latest in advanced 3D technology to make visuals and designs for sales material and displays.

With our in-house CAD system and digital print facility we are able to quickly build prototypes to develop bespoke solutions for all your displays needs.

EMERSON TEN®
THE POINT OF SALES SPECIALISTS

ESTIKO
PLASTAR
AD 1918

Estiko-Plastar AS is one of the leading packaging manufacturers in the Baltic region, holding the status of the market leader in Estonia and an essential market share in the other Baltic and Scandinavian countries. Over 70% of our production is successfully exported and we are working actively to increase the percentage of our export. Our ambition is to become known as the supplier of choice for problem-free packaging solutions all over Northern and Central Europe.

The experience gained over the years, the constant acquisition of information about the latest developments in the global packaging market and the continuing investments in human resources, technology, product research and development make us a professional, flexible and reliable partner both in the domestic and international markets.

Thanks to modern flexographic printing pressures, we can offer punctual, fast, and flexible deliveries with exceptional print quality up to ten colours. Our state-of-the-art extruders enable to manufacture different kind of films suitable for various goods and packaging lines for use in food and non-food industries.

GRANO

GRANO DIGITAL
Mustamäe tee 50
10621 Tallinn, Estonia
Phone: + 372 681 6454
www.grano.ee
order@grano.ee

Grano Digital OÜ offers a high speed and high quality solution for digital printing needs in your company: as our customer, you can concentrate on how to make your customers hear your message. Our expertise lies in realising your printing works using the best suitable technology.

Smart Printing

Main part of our products are short print runs depending on current needs.

Variable Data Printing

Digital color printing is becoming synonymous with Variable Data Printing (VDP). VDP allows for printing customized promotional materials that could possibly double or even triple response rates.

Print On Demand

Print on Demand (POD) is flexible solution for printing in small quantities. Books or other printed materials do not need to be kept in stock, reducing storage, handling costs, and inventory accounting costs. There is little or no waste from unsold products.

Interested in printing a book?

Greif will be your trusted partner throughout the entire printing and binding process!

With its long traditions, its strive for quality and up-to-date equipment, Greif Ltd is the leading book printer in Estonia, one which can offer a full cycle printing and binding service. While we take special pride in our streamlined production policy with no seasonal differences in price and delivery times, quality and client satisfaction are also of the utmost importance to us. The business' quality management system is ISO 9001:2008 certified.

The focus of our production is on printing and binding high quality books and brochures. Annually, approximately two million hard cover books, one million soft cover books and another million saddle-stitched brochures are bound here. The new production building, which lies on the outskirts of Tartu, is packed full of modern options and well thought-out logistics. It covers approximately 8,000m2 of land and provides employment for eighty people, accelerating the production process considerably.

Come visit us and see how we do it!

What we do

We are flexible and trustworthy – we give advice and make suggestions during the entire printing process to guarantee the best possible outcome, and even organise transportation where necessary.

> Ask away – we will help you realise your ideas!

Our warehouse keeps stock of a range of papers to make sure everyone can find one that is suitable for their needs. Thanks to close cooperation with some of the leading European paper manufacturers and suppliers, we are able to keep the book production time short.

The combination of professional consulting and modern technology has secured us loyal clients in Finland, Sweden, Norway, Denmark and the Netherlands.

Heidelberg is a one-stop supplier for everything from prepress solutions to a wide range of products for printing and finishing processes, relevant training and accompanying services.

Heidelberger Druckmaschinen Aktiengesellschaft (Heidelberg) has been a major provider and reliable partner to the global printing industry for many years. We offer our customers all the components tailored to their requirements for successful business operations, primarily focusing on efficient and reliable production processes, economically optimal investments and smooth access to all necessary materials.

Our business model is based on the three pillars of equipment, service and consumables. These form the foundation for our future growth as we continue to develop from being a technology-driven company to a market- and customer-oriented one. Heidelberg's goal is to increase the share of consolidated sales attributable to services and consumables to over 50 percent.

Leading large-volume commercial printer in the Baltic Sea region

Kroonpress established in 1990, is the leading printing house in the Baltic States. With an annual turnover of 41€ million, our customer base is pan-European, with the main focus on Scandinavia and the Baltics. The export formed 55% of annual turnover.

We are specialized in the production of:

- magazines
- catalogues
- newspapers
- direct mail

We offer a complete range of printing services from pre-press and repro to printing, finishing and shipping, using state of the art heatset and coldset presses operated by highly skilled professionals. Our portfolio includes over 60 regular magazines from Scandinavian publishers such as Egmont, Bonnier, Aftenposten, Aller Media, etc, and over 20 newspapers, including Estonia's biggest dailies Postimees and Õhtuleht. Additionally, we are a major producer of direct mail products and catalogues, working together with advertising agencies and print service providers from across Europe.

Leading sustainability champion

The printing plant runs on 100% renewable electricity, is heated with captured waste heat and collects all rainwater for use in production. All our print jobs can be have their carbon footprints calculated and labelled with a graded carbon footprint – the Greenline Print label – which calculates the lifecycle greenhouse gas emissions of a printed product. Each issued label comes with an online-accessible infographic label (see greenlineprint.com for more).

The company is certified for:

ISO 9001
ISO 14001
OHSAS 18001
FSC
PEFC
Nordic Ecolabel
EU Ecolabel.

Kroonpress is your professional partner for high-quality large-volume printing in the region.

Overall is a service company focused on providing and developing versatile output, digital archiving and imaging solutions. Our mission is to support our clients' aspiration to realize their business and personal goals by offering them our combined services that serve their business goals.

We believe that new technologies make life easier. However a device is just a tool, whose real value immerges when it has been skillfully integrated to the work process. Overall strives to be a client need-driven company, who can create this value. We have the people who can ask the necessary questions and suggest the suitable solutions.

By combining our knowledge of customer's expectations with existing hardware, software and professional services, we are able to offer significant added value to small and medium businesses, large corporations and professional print market alike by managing and automating their document workflow.

In our development we have set professional services as the top priority, including:

- print accounting and infrastructure management
- digital archiving and document management
- professional print and color management solutions

Overall has over 20 carefully selected product partners. Our main partner is Canon, with whom we have cooperated since 1990. We share similar values, including quality, innovation and stability.

Zeutschel, EFI, Colortrac, GretagMacbeth and Spielberg products also play a crucial role in our professional print and archiving solutions.

Overall's service network additionally offers warranty and maintenance services for HewlettPackard, 3M and Océ devices.

Overall was founded in 1990 and has grown to a company with annual revenue of over 5 million euros and a staff of 65. Starting from June 2006, Overall Eesti holds the international ISO 9001:2000 quality ceritificate. In addition to our main office in Tallinn, we have 5 regional sales and service centers in main cities and the widest service network for office equipment in Estonia.

Our Values

We believe that ethics is a cornerstone of a sustainable business. We have repeatedly passed Egmont Kids Media social audit. We support culture, sports, and children and youth activities. As a sign of environmental sustainability, we hold a Nordic Ecolabel certificate. In production we only use chemicals that are safe for the environment and our printing plates are chemical-free.

Why choose Us?

- offset and digital printing
- high quality and a reasonable price
- modern machinery with versatile technological possibilities
- excellent customer service
- emphasis on environmental sustainability
- fast and flexible delivery
- we tackle easily even the most complicated tasks
- pre-press services with consultations and file checking
- fast and flexible delivery

PAKETT
Laki 17
12915 Tallinn, Estonia
Phone: +372 656 3639
www.pakett.ee
pakett@pakett.ee

Pakett

The Pakett Printing Company has been printing high-quality books and booklets for nearly 25 years. We are able to prepare both paperback and hardcover books, as well as products that require more complex post-processing and products that are more craft-intensive. In addition to printing and binding, we also provide design, layout and editing of publications.

The printing house employs 22 staff members, and its annual turnover is nearly 1 million euros. The services of the printing house are used by more than 100 publishers in Estonia and Scandinavia. We export about 30% of our production.

Hardcover books

We mostly manufacture printed and laminated, paper-coated hardback books. We can also use spot varnishing, foil printing, etc. Hardcover books can also be covered with textile or artificial material. We also offer quarter binding with covers of two different materials.

Perfect binding and brochures

Softcover adhesive binding can be produced by either sewn or unsewn content blocks. Additional strength can be given to the cover by infolded flaps or by adding a dust jacket to the book. In addition to adhesive binding, we also produce saddle stitched and wire-o bound brochures.

Special solutions

A special product deserves a beautiful and presentable form. We have produced many customized books, including with non-traditional materials, a combination of different materials, sophisticated post-processing or less common ways of binding.

You can also ask for small quantities!

OUR SERVICES

- SILK SCREEN PRINTING
- HEAT TRANSFER PRINTING
- SUBLIMATION PRINTING
- DTG PRINTING
- DIGITAL PRINTING

LONG-TERM EXPERIENCE

We specialize in textile printing, including silk screen and digital printing. Through years of experience, we have achieved a well-known brand in the textile printing market. This means that while we invest heavily in technology, top equipment and training, we also acknowledge that in long-term we rely on skilled, motivated and empowered people to support our business success.

Since 2006

PROMOTIONAL CLOTHES

We also deal with the sale of promotional clothes. We are the official representative of the German clothing brands James & Nicholson and Myrtle Beach in Estonia. Product range is diverse:

- SPORTS
- PROMOTIONAL
- WORKWEAR
- BUSINESS
- LEISURE

Quality Print is in continuing developement, searching for new opportunities and challenges. Our goal is: to be a reliable and solid partner for our customers and to offer best quality services!

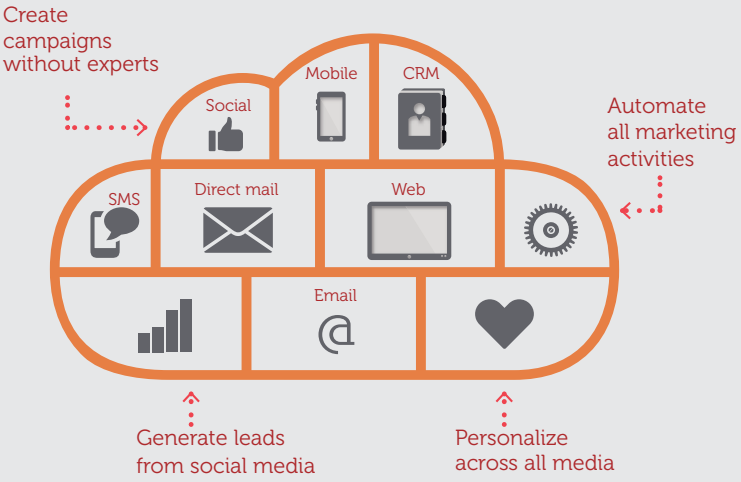
quality qp print

We are focused on companies that require highest quality. Our clients include marketing and communications departments, production companies, advertising agencies, newspapers, publishers, printers, packaging, pre-press and sign companies.

In our portfolio we have amazing tools from leading technology providers such as Enfocus, EFI, Adobe, Tilia Labs, ColorLogic, CHILI Publish, Maxon etc.

Rajand distributes tools and provides our services for companies in Estonia, Lithuania, Latvia and Finland.

Save time, ensure the quality of production and create new business opportunities - we will show you how.



Rajand.

GREAT IMPRESSIONS

As a workflow consultant, IT service provider and Cross Media specialist – Rajand provides innovative software and IT solutions for media production workflows and marketing teams.
Everything starts with a workflow analysis and ends with more efficient ways of working and smart solutions.

REVA PRINT
Tähetorni 21C
Tallinn 11625, Estonia
+372 62 569 90
www.revaprint.ee
revaprint@revaprint.ee

Well- known special effects printing house since 1992

We provide silk-screen as well as digital printing. We print from simple digitally printed products to very exclusive printed materials and packages with special effects.

Our products:

- business cards, cards/invitations, postcards, advertising materials
- envelopes, certificates, lottery cards, gift cards, also with security elements
- regular, UV & weather resistant stickers
- exclusive packages
- etc

We can print on regular, special and design papers, different type plastics & stickers, book cover materials, also special materials, such as wood veneer, roof sheet, aluminium, etc. Textiles are the only material type we can´t print.

Special effects

In addition to our regular print products there are 46 special effects waiting to make your design extraordinary. Books and magazine covers, menus, packages, business cards and invitation cards, which are printed in various printing houses, get the additional special effect from us.

Most commonly used effects:

- 3D varnish (from 12 to 160 microns) and I-foil
- spot varnish
- spot varnish with added glitter
- pearl nacreous powder added to spot varnish
- luminescent spot varnish
- fluorescent spot varnish to glow under the “money lamp” or the UV lamp
- ready-made varnish patterns
- printing with (glittery, matte, usual) gold and silver
- covering printed images with scratch-off ink (for lottery cards)

We are able to cover the prints with all-over UV varnishes and different types of laminates (gloss, matte, soft touch etc).

Since we only use materials of highest quality for all-over varnishing as well as laminating, it is possible to apply the effects on prints and then process with postpress operations (cut, fold, glue and print on, etc).

You are welcome to find out more about our services on our homepage **www.revaprint.ee**

vabamaa

Vaba Maa is a full-service media company located in Tallinn, Estonia. Even though Vaba Maa originally started as a printing company, today we help our customers with all their media needs from concept and design to post-press solutions and digital applications.

In our production process we employ state-of-the art technologies, and we continuously aim to invest in new solutions, including, for example, HUV offset and digital print. Our capabilities include a wide array of different commercial products, ranging from magazines, brochures, document folders and fliers to digital and web-based solutions.

In addition to commercial applications Vaba Maa is also the only CWA certified security printer operating in Estonia servicing multiple state and commercial clients. Our security product offerings range from paper and digital ticketing systems, certificates, national examination materials and diplomas to postal and excise stamps.

We service mostly small and medium-sized clients in Estonia and internationally, including but not limited to Finland, Sweden, Norway, the Netherlands, Denmark and Latvia. We are full members of the Estonian Chamber of Commerce and the Association of Estonian Printing.

We are ISO 9001,
ISO 14001
and CWA certified.

For more detailed information about us and our capabilities or to make an order inquiry, please visit us at www.vabamaa.ee.

Joonas Sildre (1980) is an Estonian comic artist, illustrator, and graphic designer. He graduated from the Estonian Academy of Arts in graphic design and works as a freelance artist. Sildre has illustrated close to 30 children's books and published the graphic novel Between Two Sounds – a biography of the composer Arvo Pärt. Sildre teaches comic drawing in workshops and art schools, has compiled anthologies, and organises Estonian comics exhibitions. In 2013, he became a co-founder of the Estonian Comics Society.
